

# Amtrak's Superliner

## Passenger's Manual

### Dining Car

The railroad tradition of elegant dining continues in the Superliner Dining Car. Richly upholstered booth seats will accommodate 72 passengers for breakfast, lunch, or dinner. Meals prepared in the all-electric galley on the lower level of the Dining Car are served from the maitre'd area on the upper level. The menu features regional specialties, according to route, as well as traditional favorites.

### Lounge/Cafe

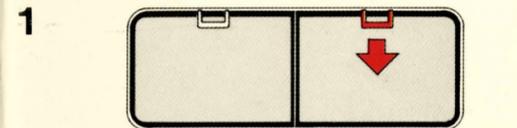

Visit our Lounge/Cafe (on trains so equipped) and enjoy seeing America as never before. At either end of the upper level you will find swivel lounge seats, televised full-length movies, and the largest windows ever used on trains. In the center of the car, beverage and snack service is available to complement the intimate lounge seating which is perfect for sightseeing and meeting fellow travelers.

The lower level of the Lounge/Cafe features a piano lounge with a professional quality electric piano, tables for playing cards or simply enjoying a meal or snack prepared in the cafe where mixed and soft drinks are also served.

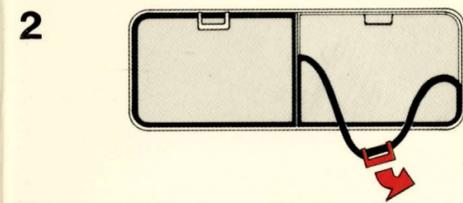

### Emergency Exit Instructions

In the event of an accident, normal exits may be blocked or inaccessible. In such cases, passengers should use the specially marked, removable windows to leave the car. The location of these windows is indicated by red arrows on the car floor plan.

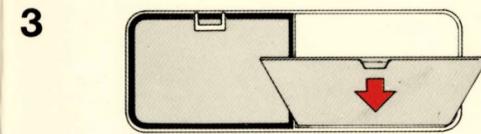

To remove one of the specially marked windows, please follow the directions below.

1 Locate red plastic handle on window and pull handle towards you.

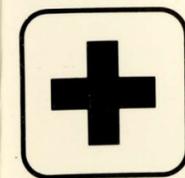

2 Use red handle to strip away rubber molding.

3 Locate metal handle on window and pull towards you to remove window pane.

### Emergency Equipment

First aid kits, fire extinguishers, and emergency tools are located on both levels of the Sleeping Car. The location of these items is indicated on the car floor plan by the following symbols—

First Aid Kit

Fire Extinguisher

Emergency Tools

### Bedroom Operating Instructions

#### Using the Bunks

The most luxurious accommodations on the Superliner are the five Deluxe Bedrooms on the upper level of the sleeping car. Their location is shown on the car floor plan in brown. The Deluxe Bedroom provides a large sofa with two individually reclining sections and separate reading lights. There are also controls for music selection and volume, room lights, room temperature, as well as an attendant call button and a 120V outlet for razors and hair-dryers.

Exclusive Deluxe Bedroom features are the reclining swivel easy chair with an overhead reading light and small parcel rack, and the toilet/vanity unit equipped with a sink, mirror, electrical outlets, and storage space for toilet articles.

The attendant will prepare your room at night as part of the Deluxe Bedroom service. If you wish to make up the bed yourself, please refer to the instructions on the back of this brochure.

No other bedroom in the Superliner Sleeping Car offers as much sleeping space as the Family Bedroom on the lower level, shown in yellow on the car floor plan. The Family Bedroom, which can accommodate two adults and two children, features a wide sofa with two individually reclining sections, a reclining easy chair, and a jump seat for occasional use. Each seat, except the jump seat, has its own reading light. Other controls include music selection and volume, room temperature and room lights. There are also an attendant call button and a 120V outlet for electric razors. Toilet facilities for Family Bedroom passengers are on the lower level, indicated in tan on the car floor plan. (See also "Toilets.")

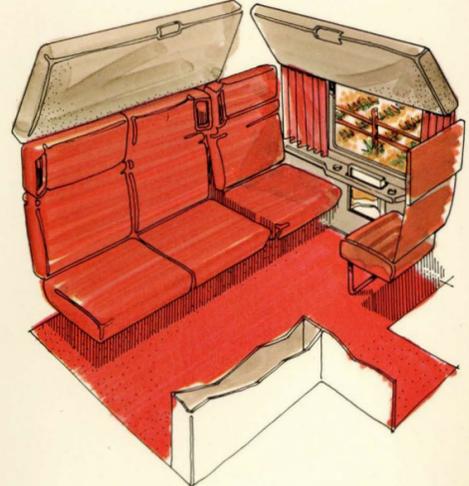

Conversion of the Family Bedroom from Daytime to Nighttime Use

### Children's Beds:

1. Using the seat release lever, fold the seat opposite the jump seat flat.
2. Fold the jump seat from the wall and be sure the support leg is locked in the down position.
3. Unlatch and lower the bunk above the jump seat.
4. Remove bedding items and pillows stored in the upper bunk and make up the children's bed.

### Adults' Beds:

1. Using the seat release levers, fold each seat of the sofa flat to form the lower bed.
2. Unlatch and lower the upper bunk.
3. Remove the ladder from the upper bunk and hook it onto the lip of the bunk.
4. Remove bedding items and pillows stored in the upper bunk and make up lower bed.

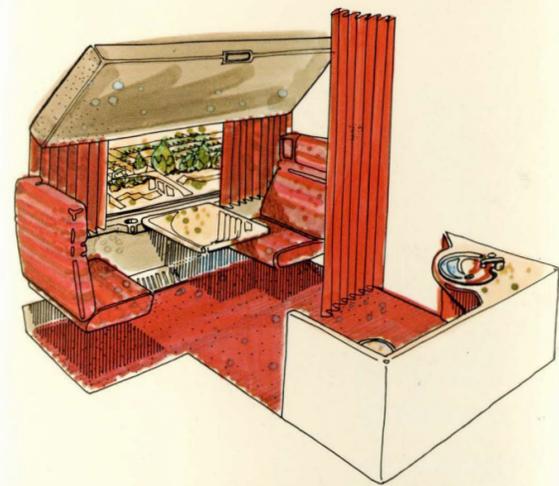

The bedroom may be converted back to daytime use by reversing the above procedure. Illustrated instructions are provided on the back of this brochure for these and other features of the Superliner Sleeping Car.

The Superliner provides the finest sleeping accommodations in the world today. Its Special Bedroom, spanning the width of the car, with windows on both sides, was specifically designed for passengers whose accommodation needs prevented them in the past from traveling by rail.

The Special Bedroom, located on the lower level, is shown in blue on the car floor plan. The bedroom provides daytime seating for two, in wide, reclining seats with individual reading lights. There are also controls for music selection and volume, room lights, room temperature, as well as an attendant call button and a 120V outlet for electric razors. A special feature is the toilet/lavatory unit with a curtain to separate the toilet area for added privacy.

At night, the two seats are folded flat to form the lower bed, and the bunk directly above the bed is lowered from the ceiling. Preparing the bedroom for nighttime use is a service provided by the attendant.

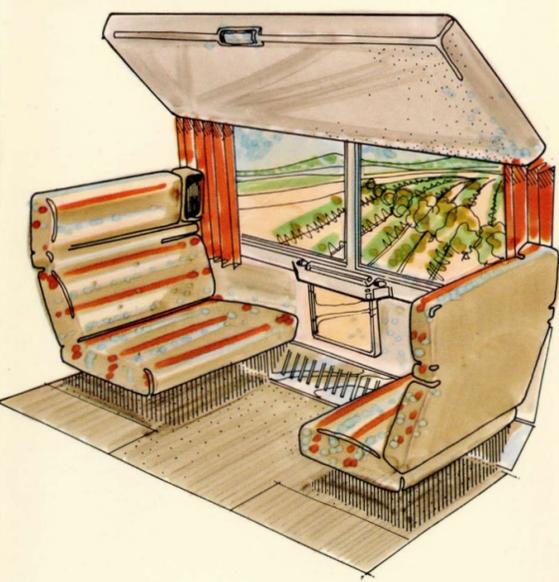

Passengers who travel in wheelchairs will find the car entry doors and aisles leading to the Special Bedroom wide enough to accommodate most wheelchairs. The bedroom itself is designed to permit full turns in wheelchairs to aid in mobility. The heights of the seats, toilet, lavatory and mirrors facilitate transfer or use while seated in a wheelchair.

Reference Dimensions

Car Entrance Door	36" 90 cm wide
Entry Vestibule	43" 110 cm wide
Aisleway and Room Entry Door	30" 75 cm wide
Maximum Turning Circle in Room	60" 150 cm diameter

Passengers unable to walk to the dining car may summon the attendant who will provide room service for meals and beverages.

Economy Bedrooms, located on both the upper and lower levels, are shown in red on the car floor plan. The Economy Sleeper offers two wide, reclining seats which fold flat to form the lower bunk for nighttime use. The upper bunk, directly above, can easily be lowered from the ceiling. The spaciousness of the room is complemented by a large window on the outboard side as well as two windows on the aisle side. The curtains of both windows may be drawn for privacy.

Each seat has a reading light. There are also controls for music selection and volume, room lighting, room temperature, as well as an attendant call button and a 120V outlet for electric razors.

Toilet facilities for passengers of the Economy Bedroom are located on the lower level, indicated in tan on the car floor plan. (See also "Toilets.")

Conversion of the Economy Bedroom from Daytime to Nighttime Use

1. Using the seat release lever, fold each seat flat to form the lower bed.
2. Raise and store armrest on the upper bunk step.
3. Unlatch and lower the upper bunk.
4. Remove bedding items and pillows stored in the upper bunk and make up the lower bed.
5. Close and lock aisle door.
6. Draw and fasten sliding curtains.

For conversion back to daytime use, reverse the above procedure. Step-by-step illustrations are provided on the back of this brochure.

Toilet rooms, indicated in tan on the car floor plan, are located on the lower level of the Sleeping Car and are for the use of Economy and Family Bedroom passengers.

Each room contains a toilet, wash basin, 120V outlet for electric razors, a large mirror, and paper towels. Cotton washcloths, towels, and soap are provided in each bedroom. A fold-down table is provided in each toilet room for baby diaper changes. There are also conveniently located clothes hooks. Should any assistance be required, please pull the attendant call button.
