S.S. Prince George

Saturday, August 2nd, 1952

MOUNT Robson, Monarch of the Canadian Rockies, whose ice-clad bulk towers 12,972 feet, is seen in all its regal splendor from the main line of the Canadian National Railways just west of Jasper. Travellers who want to come to closer terms with it ride in by horseback, through the Valley of a Thousand Falls and past Emperor Falls, to where the massive Tumbling Glacier is reflected in the superb mirror of Berg Lake.
