Jasper National Park, in the heart of the Canadian Rockies, is one of those places you have to see — and experience — to believe. Its 4,200 square miles of mountains, lakes, glaciers and waterfalls take in some of the most spectacular scenery in America. Nestling in this great natural playground is Jasper Park Lodge, the famous summer resort operated by Canadian National Railways. Above is an aerial view of the Central Building as seen from Lac Beauvert. On your next vacation, visit Jasper — America's foremost holiday resort.
