P O W E R

UNCHANGED in a changing world, steam still makes the wheels go 'round.

For the world's most powerful locomotives and fastest ocean liners, steam stands forth as the senior power element. the power behind progress and the spur that drives to ever-greater endeavor.

The "Royal Hudson," 2800 to 2865 series, is the aristocrat of the passenger locomotive world—because of steam. The 5900 series, with 33,000 pounds greater tractive effort than the "Royal Hudson" is unequalled in mountain train hauling—because of steam.

The engine rooms of the *Duchess* liners have revolutionized marine engineering—because of steam.

The Canadian Pacific has unwavering faith in steam the power that has been behind every step of its march to become the World's Greatest Travel System.
