

1927

**N**EWEST of Baltimore and Ohio locomotives are the Presidents—4-6-2, which made their appearance in this centenary year, 1927. These engines, with their 80-inch drivers, are distinguished not alone by their rare beauty but

also by their unusual power. Weighing 525,000 pounds, they are capable of hauling heavy express-passenger trains at upwards of ninety miles an hour. In their handsome liveries of green and gold they present a striking appearance.
