*Another new Service to Shippers!*

**B&O TOFCEE**  
**TRAILER-ON-FLATCAR**  
**FREIGHT SERVICE**

The Baltimore & Ohio inaugurated this modern truck-trailer rail freight service on July 20, 1954. It provides all the flexibility of truck transport plus the dependability of B&O's famous "Sentinel Service" and "Time-Saver" Service.

Under TOFCEE service, B&O moves empty trailers to shippers' platforms where they are loaded. The railroad then moves them to its terminals, loads them on specially equipped flatcars and transports them to destination terminals. There, trailers are quickly discharged and driven to receivers' platforms. TOFCEE cars move over the railroad with timetable precision—if unforeseen conditions interrupt their journey both shipper and receiver are quickly notified.

This new program is in keeping with B&O's policy to furnish convenient and efficient freight service to shippers and receivers. Ask our man!
