THE FINEST FLEET OF

Every Through Train G

THE climax to a Century of Progress—in railroad development—is *air-conditioning* of passenger trains. Gone are the dust, dirt, grime and cinders that used to be an inescapable part of a railroad journey. No more sleepless, sweltering nights in hot sleeping cars.

This modern magic, which makes its own weather, assures that you ride in fresh, scientifically cleansed and humidified air at a constantly even, comfortable temperature day and night, refreshingly cool in

CHESAPEAKE

TRAINS IN THE WORLD

genuinely Air-Conditioned

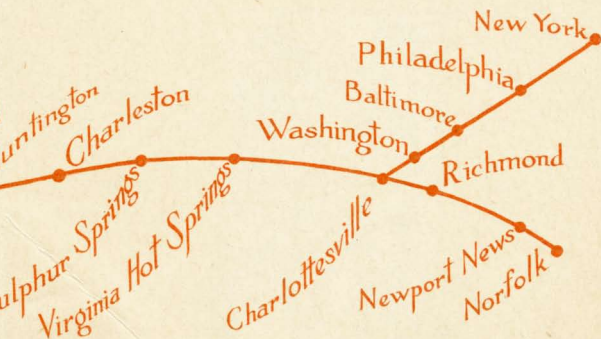

summer, cosily warm in winter. There are no drafts, and the cleanliness and quiet will amaze you.

Chesapeake and Ohio is the first railroad in the world to genuinely air-condition all its through main line passenger trains. When you travel between the East and West enjoy for yourself this greatest of all improvements in modern transportation.

No matter where you live the ticket agent of any railroad can route you over

KE and **OHIO**

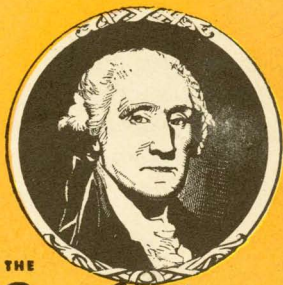

Chesapeake and Ohio Lines. Insist upon it.
