Across the line that marks the boundary between the United States and Canada, to the north of Glacier National Park, is the section of the Canadian Rockies that has been set aside for public enjoyment and named Waterton Lakes Park.

Embracing an area of 226 square miles of rugged mountain and lake country, the dominant attraction is the glacier-cut valley between the Lewis and Livingston Ranges and partially occupied by Upper Waterton Lake, which extends southward into Glacier Park.

In Waterton Lakes Park there are more than 150 miles of excellent trails which invite hikers and horseback riders to points from which to observe nature at her most exalted beauty, and to lakes and streams where good fishing is to be

A 250-passenger launch, the "International" makes regular trips between the Prince of Wales Hotel at the north end of Upper Waterton Lake and Goathaunt Camp at the south end, in Glacier Park. The ride is one you will never forget for the boat moves serenely through a double column of beautiful mountains which rise from the water's edge. The view from either end of the lake is a magnificent panorama.

At the northern end of the lake is situated the Prince of Wales Hotel. Built in the Swiss style with high, gabled roofs and dormers, carved beams, and ornamented balconies in harmony with its unique setting, the exterior delights the eye in equal degree with the attractiveness, comfort and hospitable service found within.

TAKE LAUNCH TRIPS..on larger lakes

Glacier Park Hotel, at the eastern entrance to the park, is a massive log structure accommodating 300 guests. Lake McDonald Hotel is reached by bus from Belton, western entrance to the park, and provides for more than 100 guests. Many Glacier Hotel, reached by highway buses, is the center of park activities and will accommodate more than 500 guests. Prince of Wales Hotel. Swiss type and accommodating 150 guests, is in Waterton Lakes Park.

Situated at particularly scenic points are chalet groups providing comfortable accommodations at moderate cost. East of Logan Pass are Going to-the-Sun Chalets, on St. Mary Lake; Two Medi cine Chalets, on Two Medicine Lake; Cut Bank Chalets, on Cut Bank River. West of Logan Pass are Sperry Chalets, near Lake McDonald, and Granite Park Chalets, perched high on the "Gar-

In more secluded beauty spots in Glacier Park are the trail camps, providing accommodations for fishermen and overnight comforts for trail riders. One is on Red Eagle Lake, famous for good fishing. Others are Fifty Mountain Camp, on Flattop Mountain; Goathaunt Camp, at the southern tip of Waterton Lake, Crossley Lake Camp, on the wooded shores of beautiful Cross-

INDIANS

Inhabiting the reservation just east of Glacier National Park are the Blackfeet Indians—a proud race whose traditions and history have enriched the region. These primitive people have been for years in transition from nomadic, predatory hunters to settled agriculturists, but they still cling to ancient customs. Ceremonial songs and dances and stories of the old days feature their pow-wows, to which white visitors are always welcomed. During summer months some of them live in elaborately decorated tepees near the Glacier Park Hotel.

LAUNCH TRIPS

Frequent and convenient launch schedules are maintained on five lakes, affording an easy and enjoyable way to view the panoramas in Glacier National and Waterton Lakes Parks. Round trip fares range from 50c per passenger, for shorter rides, to \$1.50 for the longer trips. Launches are operated on the following lakes: Two Medicine, Swiftcurrent, Josephine, McDonald and Waterton.

SADDLE HORSES

If you want to meet a new friend—a real friend —a reliable friend to take you along the winding trails in "the Sublime Wilderness"-ask for an introduction to any of the approximately 800 saddle horses in the park. Gentle, sure-footed and seemingly aware of responsibility, your horse will be your pal before you've been in the western-type saddle ten minutes. Whether you are a novice or a veteran, he will prove willing. able and safe.

GUIDES

Glacier Park guides are versatile westerners, as well acquainted with the enchanting mountain trails as you are familiar with your own street at home. Experienced horsemen and campers, every man of them is a true poet at heartfact you'll soon learn when you ask questions about the wonders of nature that surround you. Many of them are expert cooks-all can spir good yarns.

TRAIL TRIPS

Practically any type of saddle-horse trail trip can be arranged, from short scenic excursions—such as the interesting half-day ride from Glacier Park Hotel to Forty Mile Creek and return—to longer trips between hotels, chalets and trail camps or to special points of interest, and private party camping trips of unlimited duration. Whatever your choice may be-a ride to easily accessible places or a journey into remote, wild and infrequently visited sections of the parkyou are assured the experience of a lifetime, at a cost that is probably lower than you imagine

BUS TRIPS

From any of the hotels and two chalet groups in Glacier National and Waterton Lakes Parks you can "ride into the sky," comfortably seated in a specially-designed, open top motor coach and look, with unbelieving eyes, at grandeur you'll never be able to describe to less fortunate folks back home. Crossing the park from east to west, and extending north and south from Glacier Park Hotel to Prince-of-Wales Hotel, across the Canadian border, are marvelous scenic highways.

Going-to-the-Sun Highway takes you over the Continental Divide at Logan Pass, more than a mile and a quarter above sea level—a highway buried under many feet of snow in mid-winter. but bordered by patches of gay flowers in midsummer. Frequent stops are made to afford opportunities to see and photograph special scenes. International Chief Mountain Highway takes you along the rim of the parks, providing both close and long-range views of mountains and verdant valleys. By all means, don't miss these trips.

ROWBOATS

Rowboats for pleasure rides and fishing excursions are available at Many Glacier and Lake McDonald Hotels, Two Medicine and Going-tothe-Sun Chalets, Goathaunt and Crossley Trail Camps; also on Josephine Lake.

RANGER-NATURALISTS

During July and August a daily schedule of trips conducted by Ranger-Naturalists makes it possible for visitors to get the greatest possible pleasure from nature's treasures. With these trained representatives of the National Park Service you can go on short and long field hikes and on boat trips. You can enjoy their campfire entertainments and illustrated lectures. These privileges are available at Many Glacier and Lake McDonald Hotels; at Going-to-the-Sun and Two Medicine Chalets, and at Sprague Creek and Roes Creek. Ranger-Naturalists are also stationed at Logan Pass for the benefit of those who take the motor tours, and to conduct trips to nearby Hidden Lake and Clements Glacier. All who visit the park are urged to avail themselves of the services of these representatives.

trips between the Prince of Wales Hotel and Goathaunt Camp at the American end of Waterton Lake.

Eagerness is in the air at Glacier Park. Like a child turned loose in a candy shop, one experiences an almost overpowering desire to sample all the good things. The lure of a thousand and one delights may confuse the mind and cause

one to rush about in haphazard pursuit of new

Take the advice of the thousands who have preceded you in this unspoiled wilderness: "Take Your Time!" For example—hike without haste along marvelous mountain trails when the rising sun flashes over the snow-crested peaks and mirrors colorful mountains on the surface of turquoise lakes. Saunter through lush greenery where many species of four-footed folk and feathered friends will greet you. Stroll through acres of rare and lovely wild flowers. Pause in the misty veil of a sun-flecked waterfall. Stop -frequently-for full enjoyment of all that unfolds about you and become enriched by lasting

At mid-day, when the sun is high, see how different scenes appear when no shadow obscures the indescribable colorings on rocky slopes. See how unfamiliar flowers lift their faces to the shafts of life-giving light which are shot downward between the branches of tall, straight trees. See how the ice and snow, far up toward the summit, shine like reflectors under the meridian sun.

Finally, the enfolding dusk silhouettes the mountain peaks against the translucent sky, creating a sense of strength and majesty and calm. Twilight and evening star are nowhere else so thrill-

Later, when shadows lengthen, observe the magic of approaching sunset. Even somber rocky walls become golden; waterfalls touched by leveling rays become iridescent; lake colors deepen; mystery takes possession of the forest; animals scurry away to their night haunts.

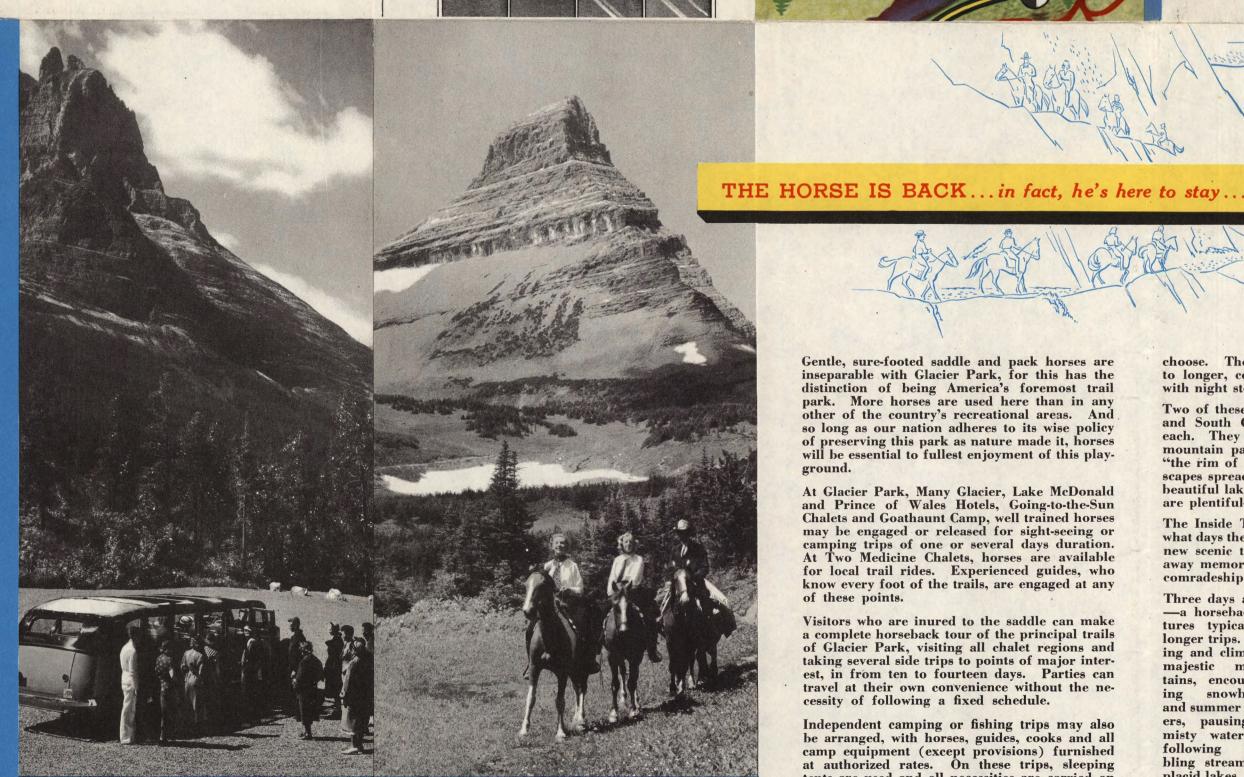

ing as here, in the heart of nature.

A majestic creature is the Rocky Mountain Big Horn

Oh yes, the question of clothes. Outing garb is the rule. A wool jacket or sweater is needed and stout shoes or walking boots, with heavy hose, are essential to hiking comfort. A pair of amber sun glasses affords good eye protection against the glare from water, glaciers and snow fields.

Here is a heaven for hikers—one thousand miles of trails with surprising vistas at

Happy trail riders in the flowered meadows near Indian Pass.

Motor tourists leaving Going-to-the-Sun for the climb to Logan Pass—Little Chief Moun-tain in the foreground.

Gentle, sure-footed saddle and pack horses are inseparable with Glacier Park, for this has the distinction of being America's foremost trail park. More horses are used here than in any other of the country's recreational areas. And so long as our nation adheres to its wise policy of preserving this park as nature made it, horses will be essential to fullest enjoyment of this play-

At Glacier Park, Many Glacier, Lake McDonald and Prince of Wales Hotels, Going-to-the-Sun Chalets and Goathaunt Camp, well trained horses may be engaged or released for sight-seeing or camping trips of one or several days duration.
At Two Medicine Chalets, horses are available for local trail rides. Experienced guides, who know every foot of the trails, are engaged at any of these points.

Visitors who are inured to the saddle can make a complete horseback tour of the principal trails of Glacier Park, visiting all chalet regions and taking several side trips to points of major interest, in from ten to fourteen days. Parties can travel at their own convenience without the necessity of following a fixed schedule.

Independent camping or fishing trips may also be arranged, with horses, guides, cooks and all camp equipment (except provisions) furnished at authorized rates. On these trips, sleeping tents are used and all necessities are carried on pack horses.

For those with less time at their command, there are many standard saddle trips from which to FROM LAKE HOTEL TO: Sperry Chalets Sperry Glacier Avalanche Basin Snyder Lake Top Mt. Brown FROM GRANITE

GREAT NORTHERN RAILWAY

choose. These range from easy half-day rides to longer, comprehensive trans-mountain tours with night stops at chalets or trail camps.

Two of these standard trips-North Circle Trip and South Circle Trip—occupy five full days each. They follow switchback trails up to high mountain passes swept by fleecy clouds; along "the rim of the world" with indescribable landscapes spread out below; down hairpin turns to beautiful lake valleys; along streams where trout

are plentiful—a succession of glorious days. The Inside Trail Trip requires four days-and what days they are! In the heart of the park, with new scenic thrills around every corner, storing away memories of spectacular beauty and good

comradeship. Three days are sufficient for the Triangle Trip -a horseback tour into which are woven fea-

tures typical of longer trips. Seeing and climbing majestic mountains, encountering snowbanks and summer flowers, pausing at misty waterfalls, following tumbling streams to placid lakes.
