

Here is the designer's conception of Great Northern

Here is the designer's conception of Great Northern's streamlined Empire Builder. Delivery of the five 12-car trains, which will operate on a daily 45-hour schedule between Chicago, the Twin Cities and the Pacific Northwest is expected in the last quarter of 1946 unless construction difficulties intervene. Exterior of the diesel powered streamliner will be orange and green. The 4,000 horsepower locomotives for the new train have already been delivered. HB-9079
