

RAILWAY AGE

THE STANDARD RAILROAD WEEKLY FOR ALMOST A CENTURY

DECEMBER 30, 1950

FOUNDED IN 18

Starting in 1938 with a single switcher, the Northern Pacific fleet of General Motors Diesels has grown steadily to its present total of 115 units, which are handling 41% of the freight traffic, 82% of the passenger traffic, and a substantial part of all switching operations. Such wholehearted acceptance confirms what most progressive railroads already know, that the surest way to faster schedules, greater patronage and lowered operating costs is through the use of General Motors locomotives.
