**30 New
General Motors E9 Units
for the Union Pacific**

To complete Dieselization, the Union Pacific Railroad has purchased 30 new General Motors E9 passenger locomotive units. The clean, smooth, high-speed operation of these 2400-horsepower units—plus their double-engine dependability in any weather—helps railroads win friends and attract business. And maximum interchangeability of parts with other General Motors locomotives helps assure lower maintenance costs.
