A Picture Book

AMERICA'S noblest mountain peak is Mount Rainier, the King of the Cascades, which rises from the center of Rainier National Park. The beauty and majesty of Mount Rainier are indescribable. Its spell is cast over the Pacific Northwest. Girdled with forests of giant Douglas fir and pine, carpeted with a glorious profusion of wild flowers which blossom to the very snow line of the Mountain, crowned with a glistening dome, the center of one of the world's largest glacial systems whose rivers of ice reach great fingers down the sides of the Mountain like a mammoth starfish—there is no single peak in the United States comparable to Mount Rainier for noble grandeur, and few, indeed, in the world.

The Park is open from June to September. Winding through great aisles of silent tree-giants, you approach Rainier through an extensive national forest, passing the beautiful rustic gateway of the Park entrance with the forest still about you.

Just within the gate is a lodge where tourists are registered, and then comes another plunge into the towering timber. National Park Inn and Longmire Springs appear suddenly, at the foot of the real beginning of the mountain road. This is a beautiful spot, where many travelers who have come for a real stay in the Park will want to linger.

The trees are now larger and larger, and through occasional gaps when the road emerges to skirt some great gorge, come dazzling glimpses of the top of the Mountain. It seems so near now that you are excited with anticipation. Surely before long you will be right there at the foot of the glaciers!

Boisterous, roaring water-falls, rushing white rivers of glacial water, awesome canyons and thrilling jagged mountain sky-lines make the approach to Paradise Inn an unforgetable experience.

The road winds on, up and up until finally it ends where the eternal snows begin.

Paradise Inn, and a little settlement of bungalow-camps, rest in the lovely Paradise Valley, 5,400 feet above sea level. Here is a beautiful hotel of the Swiss chalet type, famous for its warm hospitality. The guide house, stores, museum and camp buildings are nearby — and, right before you, dominating everything is the great white peak of Rainier, far above, yet so near that you fall silent with reverent awe as you see in detail its monumental outline and its robe of everlasting snow.

Behind the Inn rises the Tatoosh Range, a jagged, spectacular line of mountains. Constantly in your ears is the sound of rushing water, for the glaciers feed countless clear swift streams and tumbling water-falls.

Rainier National Park

The waters of Fairy Falls drop 700 feet at the head of Stevens Canyon. There are dozens of beautiful water-falls in Rainier National Park.

"Above the forests," John Muir wrote, "there is a zone of the loveliest flowers, 50 miles in circuit and nearly 2 miles wide, so closely planted and luxurious that it seems as if Nature, glad to make an open space between woods so dense and ice so deep, were economizing the precious ground and trying to see how many of her darlings she can get together in one mountain ** Altogether this wreath. is the richest subalpine garden I have ever found, a perfect flower elysium.

Indian Basket Grass is one of the statelier flowers among the bewildering varieties which bloom on Rainier's slopes. Here the adventurous spirit of Rainier Park fills you. Everyone is ready to do something. Hikers, skiiers, toboggan parties, horseback riders and mountain climbers are starting out and returning all the time. Everyone is eager and excited about unusual experiences and thrilling sights. The guides are besieged with admiring tourists who want to photograph them and question them about other trips to be taken — other sights to see.

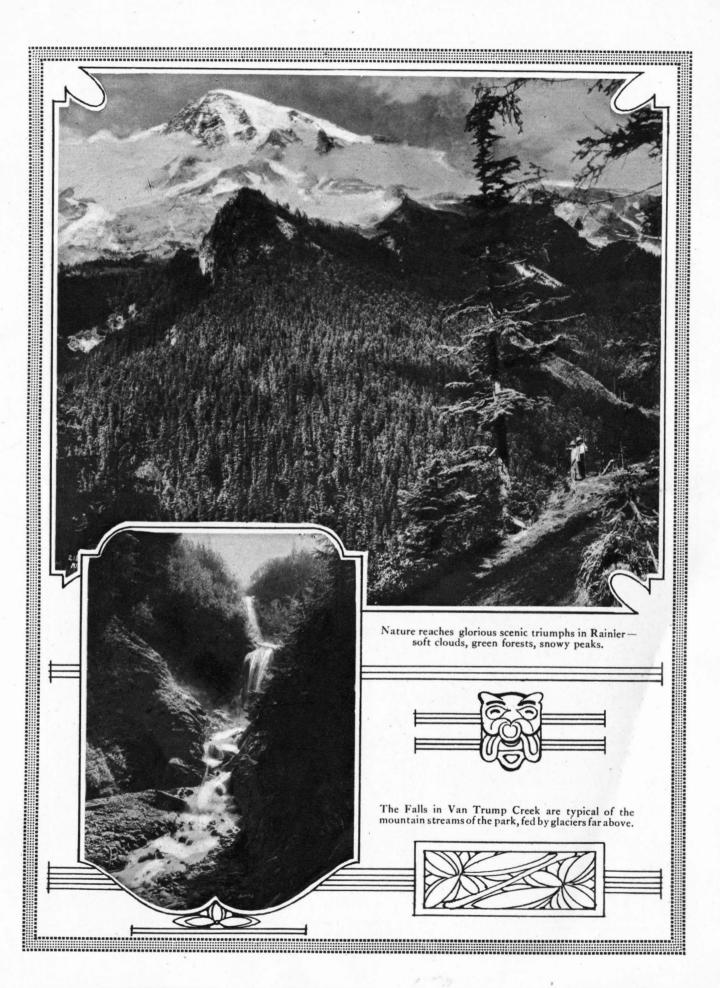

Hans and Heinie Fuhrer, the famous Swiss Alpine guides, go and come with the most ambitious climbers who aspire to nothing short of Rainier's very summit. This is a climb of almost two days and a genuine test of endurance. When a clear yodel is heard in the distance everyone rushes out to watch the summit climbers triumphantly descend after the most strenuous and glorious experience of their lives.

Every evening, pictures are shown in the auditorium adjoining the guide house, to illustrate the attractions of the hiking and saddle trips to be taken the next day on the glaciers and into the more remote regions of the Park. Sometimes big bon-fires and outdoor entertainments make the evenings gay, and dances in the big lobby of the Inn always keep a large group of guests busy and amused in the evening.

Excitement? Yes, plenty of it, but if you wish to rest, there is the long comfortable lounge, with great fireplaces at either end, there is the sunny porch facing Rainier's white dome, and there are numberless pleasant and easy paths leading through the flower fields and across the meadows surrounding Paradise Inn.

Rainier National Park is America's Switzerland. Whoever spends a vacation there is richer by far than before he entered its magic forests. He has spent wonderful hours on the slopes of "The Mountain That Was God" and he will never be able to forget them.

In summer, flowers replace the snow in the sunny meadows about the Inn and camps

Paradise Inn sleeps all winter under a blanket of snow which practically buries the hotel
