

4407 **Cliff Geyser and Firehole River, Yellowstone National Park.**
COPR. NORTHERN PACIFIC RY.

CLIFF GEYSER

Lying between the Riverside and Old Faithful geysers, along both sides of the Firehole River, is an array of geysers diverse and variable in individual characteristics as can be imagined. One of these is Cliff Geyser, which is seen in action varying from 4 to 8 hours and has an eruption lasting about eight minutes.
