*These new Northern Pacific Dining Cars embody every improvement. The electric-lights, with special reflectors, are imbedded in the roof of the car. The flooring in area-ways at each end is tiled, as is also the corridor which is alongside the kitchen. The ranges are latest model and of such construction that, with the aid of the patent ventilators, no odor of cooking can pervade the car. ¶ Just another feature to make traveling a genuine treat on the "Scenic Highway through the Land of Fortune."*
