THRU THE ROCKIES - NOT AROUND THEM

## Colorful Colorado

At no season of the year does the mountain state better live up to its well-deserved reputation than during the early Autumn months, when Jack Frost's magic paint brush adds splashes of brilliant gold to a landscape already colorful.

Pictured on the cover is a typical Colorado mountain scene in the fall of the year. High on the flank of the Continental Divide, the Quaking Aspens have felt the first icy breath of winter and the color of their ever-quivering leaves has been transformed to a coppery yellow, providing a brilliant contrast to the deep tones of the evergreens. Outcroppings of weird rock formations further enliven the scene . . . and behind it all the matchless blue of a cloud-flecked Colorado sky.

An endless variety of such scenes are commonplace in this fortunate land. With its two main-line crossings of the Continental Divide, the Rio Grande alone of all railroads gives the traveler access to Colorado's scenic wonders. Its routes traverse the backbone of the continent, and thread through the thrilling gorges and canyons carved by the rushing waters of the Colorado, Arkansas and Eagle rivers. Truly, "Through the Rockies, Not Around Them."
