

The Mighty "6000"

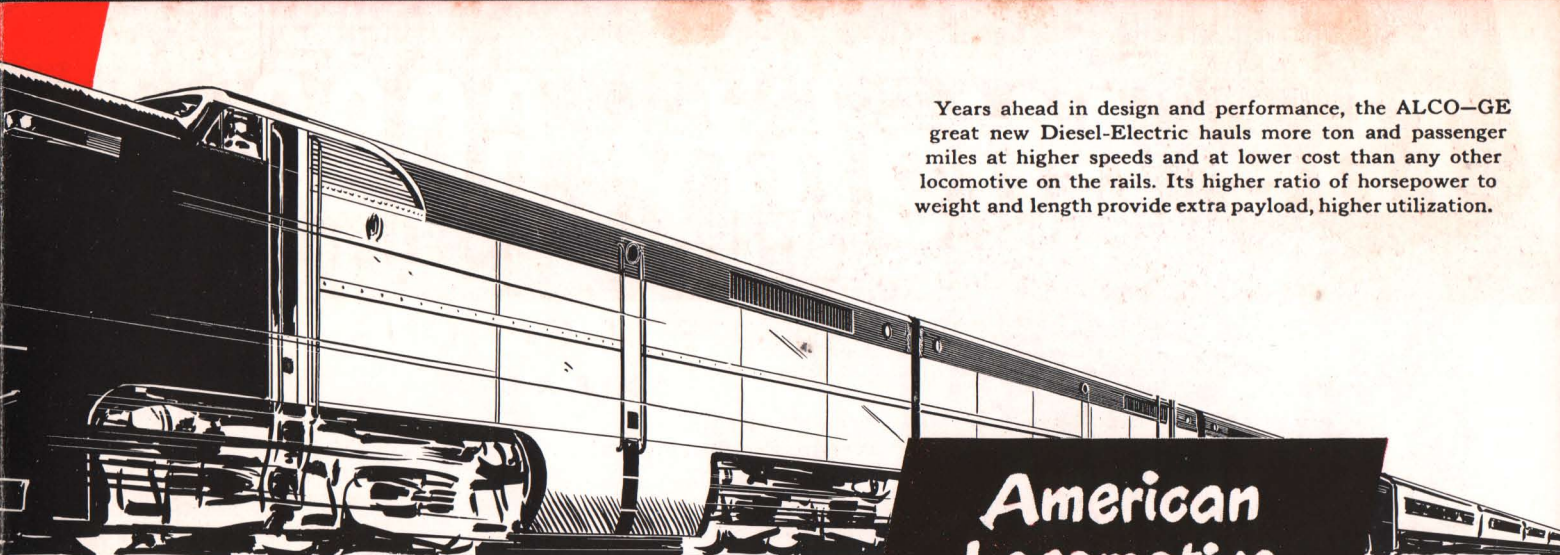

SPECIFICATIONS

2000HP A UNIT

Weight	304,500 lbs.
Weight Per Driving Axle.....	50,750 lbs.
Length	65' 8"
Height	14' 11"
Wheel Base	49' 8"
Trucks	2-6-wheel cast steel
Wheels	40" diam.
Tractive Effort (starting).....	61,000 lbs.
Engine.....	ONE 2000HP, V-type, 16 cylinder, turbosupercharged
Speed.....	Geared in ranges up to 120 MPH
Fuel Capacity	1200 gal.
Lubricating Oil Capacity.....	250 gal.

Years ahead in design and performance, the ALCO-GE great new Diesel-Electric hauls more ton and passenger miles at higher speeds and at lower cost than any other locomotive on the rails. Its higher ratio of horsepower to weight and length provide extra payload, higher utilization.

American Locomotive

THE MARK OF MODERN ENGINEERING

Its high availability, operating flexibility and low maintenance cost will enable the railroads to surpass every known standard for profitable passenger and ultra-high speed freight service.

Products of
AMERICAN LOCOMOTIVE CO.
And Its Divisions

LOCOMOTIVES — Steam, diesel-electric,
and electric.

Locomotive accessories, parts and
specialties—high grade forgings.

ALCO PRODUCTS DIVISION

Pressure vessels, tubular equipment and
heat transfer equipment, fabricated steel
plate work and prefabricated piping for
the petroleum, chemical, food, paper,
power, marine, municipal and other re-
lated fields.

DIESEL ENGINE DIVISION

High and low speed diesel engines of
two and four cycle principle for station-
ary and marine service.

RAILWAY STEEL-SPRING DIVISION

Steel springs, locomotive and car-wheel
tires, steel-tired wheels and other prod-
ucts for railroad equipment and indus-
trial use.
