# POST CARD

Canyon Diablo is a gash in the level plain 540 feet wide and 222 feet deep and is crossed by a steel bridge 600 feet long. It has the appearance of a volcanic rent in the earth's crust. Through the notch at the bottom a thread of a stream trickles. The name is Spanish for Devil's Canyon.

Have seen snow  
melt all day. Lots of  
dove houses, cattle &  
mountains for scenery.  
Will be glad to reach  
Phoenix.

Lots of love

Eula & Geo.
