The Astra Dome COACH

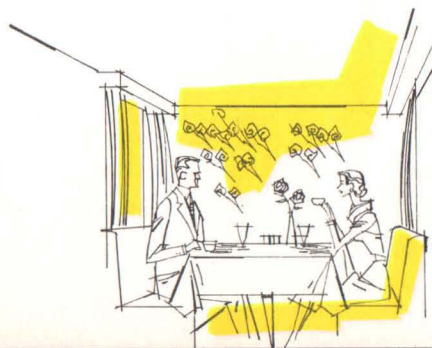

Here is the finest dome-type Coach ever built for the enjoyment and comfort of rail travelers. Large size picture windows and divan seats placed at a slight angle provide maximum visibility for all occupants. There's double-capacity air conditioning whenever required. In the "lower deck," reserved "Sleepy Hollow" seats have adjustable head rests and stretch-out leg rests.

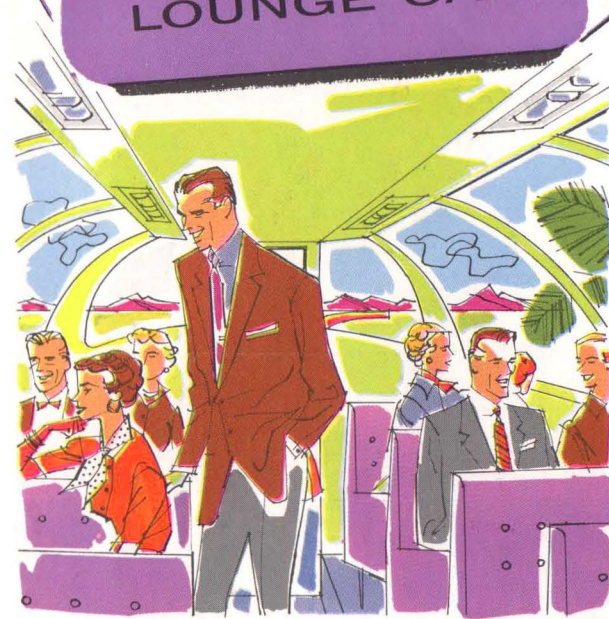

The Astra Dome DINER

These are the only dome diners in transcontinental service; a Union Pacific "first" on the "City of Portland" Domeliner. Imagine viewing the ever-changing scenery while being served the finest of freshly prepared foods. In the downstairs section, there's a smartly-appointed private dining room reserved for small parties, in addition to tables seating four persons.

The Astra Dome OBSERVATION LOUNGE CAR

Another luxurious dome car which combines beauty with smooth-riding comfort. It's a new thrill in travel to view, through the wide picture windows, the magnificent Columbia River Gorge which the "City of Portland" route parallels for 200 miles. The "lower deck" features a private card room, attractive cocktail lounge, and comfortable chairs for complete relaxation.
