

Odessa Lake and Notchtop Mountain, Rocky Mountain National Park

Rocky Mountain National Park

ROCKY MOUNTAIN NATIONAL PARK, with its superb Alpine landscapes and towering granite peaks, includes the finest grouping of mountain scenery in the Colorado Rockies. Substantially all of its 378 square miles, fifty miles on an airline northwest of Denver, rise above 9,000 feet, more than a mile and a half above sea level. Dominating the rectangular area of the Park stand the lofty peaks of the Continental Divide, summit after summit, each with an impressive individuality of contour and carving, dark evergreen forests sheathing the major part of their slopes, mosaics of perpetual ice and snow relieving the firm majesty of their precipitous crests. Loftiest and most splendid of these summits is imperial Longs Peak, 14,255 feet high.

The rivers of the Park, rising generally in icy basins beneath the peaks, have cut long, rugged canyons through the eastern slopes, and these often widen out into charming valleys and natural "parks." Upon the terraced floors of the canyons are more than one hundred lakes, some icebound and crag-encircled, some margined with wild flowers. In the west other streams, bound for the Pacific, have worn great gorges for their waters. Everywhere there are rich gardens of wild flowers; there is also a wealth of bird and animal life.

A striking feature of the Park is the ease with which the deepest canyons and loftiest summits may be reached by highways and trails. The season is June 15th to October 1st, although the Park is open the year round. A large number of hotels and resorts afford a wide range of excellent accommodations. The fine, fast train service of the Union Pacific System directly serves four gateways to Rocky Mountain National Park: Denver, Fort Collins, Greeley and La Salle.
