

The youngest university in the United States, the University of Kansas City, established in 1933, has taken rapid strides in the field of major education. The only privately controlled university between St. Louis and Denver, it is noted for its vigorous pioneering in a basic Liberal Arts program, for its School of Dentistry, now the fifth largest in the country; for its five-year course in the School of Pharmacy, and for its fifty-three-year-old School of Law, whose graduates occupy important positions throughout country. Upon President Truman, an alumnus of the School of Law, and President Miguel Aleman of Mexico, who visited Kansas City in 1947, the university has conferred the only two honorary degrees it has awarded.

The William Volker campus, comprised of eighty-five acres adjoining the residential Country Club Plaza district, is the hub of a cultural center unique in American cities. Now but partially completed, this center includes, in addition to the university, the seven-million-dollar Linda Hall scientific library, the Midwest Research Institute, the William Rockhill Nelson Art Gallery, which faces the university across the adjacent hills, the Menorah Hospital, and the Kansas City Art Institute.

The university which a short sixteen years ago began in a single building with a faculty of 18 and a student body of 250, now has 12 buildings, a faculty of 260, and a student body of 5,000. The recently completed University Playhouse is one of the best technically-equipped and most attractive educational theaters in the United States.

Liberal Arts Building, The University of Kansas City.
