

Located in Northern Arizona, the Grand Canyon is actually a vast network of yawning chasms, following the course of the surging Colorado River for 217 miles. Countless artists have painted its enthralling magnificence, and volumes have been written about it, but the Grand Canyon of Arizona must be *seen* with your own eyes to be fully appreciated.

A good vantage point is from beautiful Grand Canyon Lodge on the brink of the North Rim, 1,000 feet higher than the opposite rim, 12 miles distant. To gaze through the broad windows of the Lodge at the great sea of shifting, changing rainbow colors of the unfathomable gorge is an exalting experience.

Grand Canyon is linked by paved highways with near-by Zion and Bryce Canyon National Parks in Southern Utah. This group of three scenic wonders attracts thousands of vacationists annually.

Many travelers enroute to or from California, via Union Pacific, arrange for stop-over privileges at these world-famed National Parks.

Grand Canyon from North Rim — immense, awesome, yet intimate and friendly with those who learn to know and love it.
