

The San Francisco skyline, framed by the mighty towers of the San Francisco-Oakland Bay Bridge, is an impressive sight. This great bridge that links the East Bay with "The City" is a miracle in steel, and its giant cables hang with grace and ease from the lofty towers that stand firmly on the rock below the waters of San Francisco Bay.

The building of such a bridge long intrigued the minds of construction engineers. And when the opportunity came they wrought well. Begun in 1933, it was opened to traffic in 1936. Total cost was nearly 80 million dollars. It is planned to liquidate this cost through tolls, without taxation, until the bridge is toll free. The structure, with approaches, is about eight and one-quarter miles long, suspension type to Yerba Buena Island and cantilever type from there to the shore at Oakland.
