

California calls to the traveler, the pleasure seeker and the home builder. Its mountains, its seashore, its great romantic cities and its industrial opportunities each extend the invitation. Among its attractions, however, not the least are its network of fine highways, its splendid city boulevards and its scenic drives.

Carmel Bay, near Monterey, is a favorite spot for artists and photographers who endeavor to catch on canvas or film the beauty which nature has fashioned here. Stone crags topped with weirdly shaped trees add to the charm of this fascinating place. Monterey cypress along the shoreline and Monterey pine, both named for the City, grow in a limited area in the vicinity. The constant surging of the surf in the coves and inlets is a fascinating sight. Many forms of outdoor sport are enjoyed round and about.

Fish canneries represent Monterey's chief industry, and moored to the wharves, or anchored off shore may be seen the brightly painted boats of the fishing fleet.
