Steward in Charge of this Car is.....

P. M. SCOTT, Supt. of Dining Car Service, Chicago  
A. COTSWORTH, JR., Passenger Traffic Manager, Chicago

## *The Royal Gorge*

Since the beginning of time, Nature has been at work fashioning countless masterpieces of scenic splendor in many colors, sizes and shapes . . . all for the everlasting enjoyment of mankind.

One of her noblest efforts is the Royal Gorge, a mighty crevasse in the majestic Rocky Mountains in central Colorado. This grim, stupendous canyon is ten miles long and for the most part so narrow that almost anyone can toss a stone from wall to wall. The eye is amazed at the myriad rainbow colors and grotesque formations of the jagged granite walls that rise almost perpendicular for more than a thousand feet. The peaceful silence is broken by the turbulent Arkansas River, racing madly onward as though anxious to reach its destination.

Threading its way through the canyon is the Royal Gorge line of the Denver & Rio Grande Western Railroad, with which the Burlington connects at Denver. At one point where the chasm narrows to a mere thirty feet, the railroad tracks pass over the famous Hanging Bridge, which, as its name implies, is suspended by immense steel girders securely buried in the solid granite walls on either side. This is doubtless the only bridge of its kind in the world.

Here, too, one has but to look skyward and behold one of the great engineering marvels of the age, the World's Highest Bridge, which is suspended across the Gorge 1,053 feet above the bottom of the canyon. This colossal structure is 1,250 feet in length and over twice the height of any other suspension bridge in the world. From its eerie height there is a superb view of the Rockies for a hundred miles north and south, as well as of the Gorge itself, where seemingly toy trains wind their way between the precipitous walls.
