RAILWAY AGE

THE STANDARD RAILROAD WEEKLY FOR ALMOST A CENTURY

JANUARY 22, 1951

Among the more than 200 crack passenger trains powered by General Motors Diesel locomotives are all of the Great Northern Railway streamliners. These swift, modern trains include the transcontinental Empire Builder fleet and the shorter-run International and Red River. Also used extensively by the Great Northern for other passenger, freight and switching service, General Motors locomotives have established records for efficiency and reliability.
