

RAILWAY AGE

THE STANDARD RAILROAD WEEKLY FOR ALMOST A CENTURY

APRIL 9, 1951

FOUNDED IN 1856

Penick

Completely dieselized since May 1, 1950, the Chicago and Eastern Illinois Railroad is handling 100% of its freight and passenger traffic with General Motors locomotives. Pulling 25% more ton-miles than steam, GM Diesels are showing a 33% saving in through-freight service. Sixteen years and more than two billion unit miles of experience have proved that dieselization with General Motors locomotives is one of the soundest investments railroads can make.
