

FOUNDED IN 1856

RAILWAY AGE

THE STANDARD RAILROAD WEEKLY FOR ALMOST A CENTURY

JUNE 16, 1952

It is a matter of great pride to Electro-Motive that General Motors' locomotives have been given a part in the continuation of the great tradition of the 20th Century Limited. These locomotives have been assigned as motive power of the "Century" since its dieselization in 1945. Recently, the New York Central's Diesel fleet reached 1650 units, the last of which was a new 2250 HP General Motors high-speed passenger unit assigned to the "Century."
