RAILWAY AGE

THE STANDARD RAILROAD WEEKLY FOR ALMOST A CENTURY

NOVEMBER 17, 1952

With over 95% of its gross ton miles and 65% of its passenger car miles now being operated by Diesel locomotives, dieselization of the Jersey Central Lines will be largely achieved next spring when the last of 38 units now on order are delivered. And, with a total of 53 General Motors units in service, "The BIG Little Railroad," first in America to use Diesel power, will provide faster, more efficient passenger and freight service all along the line.
