THE BEST LOCOMOTIVES ARE EVEN BETTER TODAY

Five 1750-Horsepower GP9's Delivered to Bangor and Aroostook

Bangor and Aroostook operates a variety of General Motors passenger, freight and switching units. With this well-balanced fleet, its Operating Department can match motive power to train requirements—can get the best return on motive power investment by selecting the right locomotive for the job.

Before you place your next Diesel locomotive order, check tractive effort, working ability and the cost of spare parts and components. When you do, you'll find that a General Motors locomotive performs better, lasts longer, costs less to operate and maintain than any other Diesel locomotive.
