THE BEST LOCOMOTIVES ARE EVEN BETTER TODAY

## 51 GM Diesels to Soo Line and Wisconsin Central

The delivery of General Motors Diesel units now being made to the Soo Line and Wisconsin Central includes 34 GP9's, 16 SW 1200's and one SD9. Flexibility is the keynote of the 1750-H.P. General Purpose units because they enable railroad Operating Departments to match motive power to train requirements—to pick the right locomotive for the job!

And standardizing on General Motors locomotives for both road power and switching service means a greater return on your locomotive investment. Besides doing more work at less cost, they cost less to maintain. One inventory of parts serves to protect the entire fleet—and experience proves GM Diesel parts cost less, last longer.
