18 New General Motors Locomotive Units for the Rio Grande

To handle increasing traffic on its dieselized lines across the Colorado Rockies, the Denver and Rio Grande Western has recently added 18 new General Motors locomotives to its fleet—12 GP9 and 6 F9 units. This chart shows the Rio Grande's steady increase in gross ton-miles per train hour since 1946. Truer than ever today, the more GM Diesels on the line, the higher the efficiency and the lower the operating costs.
