Northern Pacific Rivers

1,406 Miles of Rivers, Chicago to Seattle

For 1,406 miles, two-thirds of the distance between Chicago and Seattle-Tacoma on the North Pacific Coast, the North Coast Limited of the Northern Pacific Railway travels along the banks of some of the most picturesque rivers in America. It is indeed a route of "startling beauty." Rivers of Minnesota, fed by 10,000 lakes; rivers of Dakota, through wheat fields and the colorful Bad Lands; rivers of Montana, across vast cattle ranches and into the Rockies; rivers of Idaho, with mountains climbing high overhead; rivers of Washington, which bring life to great orchards; and the Columbia, Oregon's own.

After leaving the new Chicago Union Station on the C., B. & Q., the North Coast Limited follows the Mississippi River, "Father of Waters," for 383 miles; the historic Yellowstone is followed for 341 miles; the Missoula River, through the most impressive portion of Montana's "Shining Mountains," 106 miles; the Clark's Fork, from Montana into the lofty Idaho Rockies, 93 miles; and the Yakima River, through great, volcanic lava beds and contrasting, blossom-spread valleys in Washington, 141 miles.

Travelers going direct from Spokane to Seattle, follow the Columbia River for 7 miles; if they go from Spokane to Portland, the Columbia is followed for 220 miles.

Other streams which Northern Pacific main line trains follow, cross and re-cross, are:
