Through the American Rockies on the Northern Pacific

Mount Spokane, a massive rock hill overlooking the rugged country about Spokane, on the eastern edge of the Inland Empire, takes its name originally from the Spokan’ tribe of Indians, whose forefathers lived virtually under its shadow.

Mount St. Helens, visible between Napavine and Chehalis, is a 9,750-foot snow-coveled picture mountain, famed throughout the Northwest for its beauty. Seen across Mirror Lake, it forms a memorable awe-inspiring picture.

Mount Rainier, probably the best known of all the Cascade Range, rears its snowy crest up from the heart of Rainier National Park, surrounded by the Tatoosh and other ranges. It is 14,408 feet high and wears a tremendous greatcoat of many glaciers.

The Beartooth Mountains, second range visible to the westbound Northern Pacific traveler, rises in rugged majesty to the southwest between Billings and Laurel, Montana. Here are the vacation playgrounds of many of Montana's celebrated浪漫 Ranches.

Mount Adams, 12,250 feet, is a snow-capped dome visible from the train between Napavine and Chehalis, Washington—one of the outstanding peaks of the Cascade range.

Mount Hood, among the most beautiful of the Cascade peaks, rises 11,225 feet above sea level, east of Portland, Oregon. "One sharp, angular peak and only one, a mammoth, natural, alabaster-like pyramid" May be seen from Northern Pacific S. P. & S. trains on North Bank of Columbia River.
